INTRODUCTION

This is the fourth comprehensive decennial Census of Merchandising and Service Businesses taken in Canada. The census covers all known retail and wholesale places of business and most service enterprises. Services not included are broadly those relating to education, health and welfare, religion, professions, finance and trade and labour associations. Retail trade covers recognized stores although supplemental data on other avenues of consumer buying, such as direct selling (house to house), direct mail, etc., will be shown in Bulletin 6.1-8. Wholesale trade in general covers establishments selling merchandise to others for resale and to industrial and commercial users. At the time of the census, in June 1961, the enumerators listed all retail, wholesale and service businesses as required. After checking with various other sources, such as trade association lists, etc., appropriate questionnaires were mailed early in 1962 to cover the complete 1961 business year.

Classification changes

Under a recent revision to the Standard Industrial Classification, certain trades have been moved from one field to another. The 1961 Census results include the following changes as compared to previous censuses:

Restaurants, caterers, cocktail lounges, taverns, dress-makers - from retail to service.

Lumber and building material dealers, farm implement dealers, feed stores, farm supply stores, harness shops—from retail to wholesale.

Automotive repair shops (several kinds), radio and TV repair shops, jewellery repair and engraving, bicycle repair—from service to retail.

Dental laboratories, electro-plating, machine shops, upholstery shops—from service to manufacturing.

Definitions

Statistics on merchandising and service businesses are presented under two concepts—location and establishment. Location statistics¹ show every separate place of business in its own classification, while establishment statistics include the accounting entity according to the major activity. For example, a firm operating a wholesale and a retail hardware business from two separate locations would be classified in its entirety as a wholesale hardware establishment if the wholesale operations predominated; for location statistics, the retail store would be classed as and included with retail trade, the wholesale location with wholesale trade. A business location may be within the scope of the census, but the establishment of which the location is a part may not be within scope.

Kind of business classifications for wholesale trade will be found in Bulletin 6.2-6; service trades in Bulletin 6.2-13; and retail trade in Bulletin 6.1-8.

Maps for provinces by county or census division and for metropolitan and major urban cities may be obtained by ordering Census Bulletin 1.1-9. Maps showing census tracts of metropolitan cities will be included in the special reports for retail trade and for service trades by census tracts.

Copies of the basic questionnaires used for the 1961 Census are shown in the introductory bulletins -6.1-8 retail; 6.2-6 wholesale; and 6.2-13 service.

¹ This bulletin presents geographic detail for areas as small as incorporated places of 1,000 population, Table 32 shows information for selected trades at the county or division level in more detail than in previous censuses. Tables 33 and 34 show 1951 data revised for the classification changes mentioned above since totals as published in Census Volume VIII, 1951 are not directly comparable with 1961. It was necessary to blank out many figures to avoid disclosure, especially as between city proper (Table 34), metropolitan areas (Table 29 of Bulletin 6,2-7) and county or division total (Table 32),

Le présent Recensement des entreprises de commerce et de service est le quatrième recensement décennal complet de cette nature effectué au Canada. Il embrasse toutes les maisons connues de commerce de détail et de gros et la plupart des entreprises de service. Les services qui ne sont pas inclus sont ceux, en général, qui ont trait à l'enseignement, à la santé et au bien-être, au culte, aux professions libérales, aux finances et aux associations commerciales et ouvrières. Le commerce de détail couvre les magasins reconnus mais des données supplémentaires sur d'autres facilités d'achat offertes au consommateur telles que la vente directe (de porte à porte), la vente directe par la poste, etc., paraîtront dans le bulletin 6.1-8. En général, le commerce de gros comprend les établissements qui vendent de la marchandise à autrui pour la revente et aux consommateurs industriels et commerciaux. Lors du recensement, en juin 1961, les agents recenseurs ont dressé la liste de toutes les entreprises de détail, de gros et de service visées. Après vérification à diverses autres sources telles que les listes d'associations commerciales, etc., des questionnaires s'appliquant à l'année commerciale entière de 1961 ont été expédiés par la poste au début de 1962.

Modifications apportées à la classification

A la suite d'une récente revision de la Classification type des industries, certains commerces ont été transférés d'une catégorie à une autre. Au regard des recensements antérieurs, les résultats du recensement de 1961 comprennent les changements suivants:

Restaurants, traiteurs, salons-bar, tavernes, couturières — du détail aux services.

Marchands de bois d'oeuvre et de matériaux de construction, marchands d'instruments agricoles, magasins d'aliments pour animaux, magasins de fournitures agricoles, magasins de harnais — du détail au gros.

Ateliers de réparation d'automobiles (diverses sortes), ateliers de réparation d'appareils récepteurs de radio et de télévision, réparation de bijouterie et gravure, réparation de bicyclettes — des services au détail.

Laboratoires dentaires, galvanoplastie, ateliers d'usinage, ateliers de rembourrage — des services à la fabrication.

Définitions

La statistique des entreprises de commerce et de service est fondée sur deux concepts—le local d'affaires et l'établissement. La statistique du local¹ d'affaires situe chaque maison de commerce dans sa propre catégorie, tandis que la statistique de l'établissement comprend l'entité comptable fondée sur l'activité principale. Par exemple, une firme qui exploite un commerce de ferronnerie en gros et en détail à deux endroits différents sera classée en entier comme établissement de ferronnerie en gros si son commerce de gros y prédomine. Quant à la statistique du local d'affaires, le magasin de détail sera classé comme commerce de détail et le local d'affaires en gros, comme commerce de gros. Un local d'affaires peut s'inscrire dans le cadre du recensement mais l'établissement dont le local d'affaires est une partie peut ne pas s'y inscrire.

On trouvera les classements suivant le genre de commerce dans les bulletins 6.2-6 (commerce de gros); 6.2-13 (entreprises de service); et 6.1-8 (commerce de détail).

On obtiendra des cartes des provinces par comté ou division de recensement et des villes métropolitaines et grandes agglomérations urbaines en commandant le bulletin de recensement 1.1-9. Des cartes indiquant les secteurs de recensement des villes métropolitaines seront incluses dans les rapports spéciaux sur le commerce de détail et les entreprises de service par secteur de recensement.

Des reproductions des questionnaires de base utilisés lors du recensement de 1961 paraissent dans les bulletins introductoires -6.1-8 détail; 6.2-6 gros; et 6.2-13 services.

¹ Le présent bulletin contient les particularités géographiques de régions aussi peu étendues que les localités constituées de 1,000 habitants. Le tableau 32 donne, de façon plus détaillée que lors des recensements antérieurs, des renseignements sur certains commerces à l'échelon du comté ou de la division. Les tableaux 32 et 34 contiennent les chiffres de 1951, revisés pour tenir compte des modifications apportées à la classification et mentionnées ci-dessus, parce que tels qu'ils sont contenus dans le Volume VIII du recensement de 1951 ils ne sont pas rigoureusement comparables à ceux de 1961. Afin d'en éviter la divulgation, il a fallu oblitérer plusieurs chiffres, surtout entre la cité proprement dite (tableau 34), les zones métropolitaines (tableau 29 du bulletin 6.2-7) et le total du comté ou de la division (tableau 32).

REPORTS OF THE CENSUS OF CANADA, 1961

This report is one of a series comprising Volume VI (Part 2) of the 1961 Census. (See outside back cover for other Volume Series.) Reports in these series are so prepared that, by removal of the covers, the contents can be combined to form the materials of each census volume. A hard-covered binder, suitably titled, is supplied to purchasers of the complete set of reports for any given volume.

Individual reports of Volume VI (Part 2) are listed below. They can be ordered singly by catalogue number, or the complete set including the cover binder at a composite price of \$6.00. Orders may be sent to Publications Distribution, Dominion Bureau of Statistics, or to Superintendent of Publications, Department of Public Printing and Stationery, Ottawa. Regulations require that remittance be made prior to the mailing of reports, in the form of a cheque or money order payable to the Receiver General of Canada. Orders for reports not yet released will be filled as soon as they become available.

A brochure is available listing the individual reports for other Volume Series of the 1961 Census, as well as special reports, etc. For a copy of this brochure, or for further information on census publications, address your inquiry to the Information and Public Relations Division, Dominion Bureau of Statistics.
